

National Broadband Network – Rollout Information

The data contained in this document reflects NBN Co's position for the week ending 21 March 2024

Weekly Summary

This weekly report by NBN Co of network rollout progress reflects the Government's requirements for greater transparency as set out in the Statement of Expectations to NBN Co. This shows rollout progress as of last Thursday 21 March 2024.

A total of 2,305 additional lots/premises were ready to connect during the week. This included an increase of 162 in Brownfield areas, an increase of 2,073 in New Development areas and an increase of 70 premises in fixed wireless and satellite areas.

During the week an additional 3,240 premises had services activated on the network, including 3,137 more on fixed line services and 103 more using satellite and fixed wireless technologies.

As at 31 December 2023 the number of Yet to ready to connect premises that require construction before a customer can order an nbn™ service is 1,124 (QLD: 455, NSW: 443, ACT: 0, VIC: 226, TAS: 0, SA: 0, WA: 0, NT: 0).

Ready to connect: A premises is ready to connect when an nbn™ service order can be placed, and the service can be connected within an area that has been declared ready for service.

Yet to ready to connect: These are premises that require construction work before an nbn™ service can be ordered, which may or may not be within a location declared ready for service. These do not include premises within new development locations.

Premises activated: Refers to premises which have an active service installed.

Variations in number from week to week reflect the modular construction program. The construction program is completed in blocks, so variations may occur. Following completion of the construction process passing premises in the streets, further validation of address data is undertaken of the 'as built' network against estimates obtained from national address data. There may be some fluctuation in numbers from week to week as a result. Note, as at 20 May 2021 we have removed the definition for 'Not yet ready to connect' and 'RFS area' and added a new definition for 'Yet to ready to connect'.
