NBN Co provides the Joint Committee on the NBN with detailed data

Data shows costs within plan

NBN Co executives today appeared before the Joint Committee on the National Broadband Network to provide the latest information on the progress of the rollout.

In addition to taking questions, NBN Co also released a comprehensive set of data on the financial performance of the company and key metrics such as Capex and Opex, as well as costs broken down to the level of premises passed and connected.

NBN Co updated the committee on the total number of premises connected, user speed profiles and monthly average usage.

Also included was analysis of the wholesale prices over time for example services, based on the forecasts used in the Corporate Plan.

The tabled document is available on the NBN website.
