# 3 Year SAU Pricing Roadmap: 1 December 2023 to 30 June 2026

## Introduction

This Pricing Roadmap is published pursuant to clauses 2B.2.4 and 2B.2.5(b) of **nbn**'s Special Access Undertaking, as varied on 17 October 2023 (**SAU**). This Pricing Roadmap takes effect on and from 1 December 2023.

This Pricing Roadmap sets out Prices for each NBN Offer, Other Charge and other WAPC Charge Component, as well as CVC inclusions for each Bundled TC-4 Offer and Bundled TC-2 Offer, and Forecast Average Combined Charges for each Bundled TC-4 Offer.

In this Pricing Roadmap:

- the Prices and CVC inclusions for FY24 correspond with the Prices and CVC inclusions in the SAU Tariff List published by **nbn** on 1 November 2023 for the period 1 December 2023 to 30 June 2024;
- the Prices and CVC inclusions for FY25 and FY26 are indicative and non-binding, subject to the application of the TC-4 Price Relativity Restriction in the SAU; and
- the Forecast Average Combined Charges are based on forecast industry averages and are calculated in accordance with clause 2F.4.2 of the SAU.

In developing this Pricing Roadmap, **nbn** has relied on Consumer Price Index (CPI) forecasts in the Statement of Monetary Policy published by the Reserve Bank of Australia (**RBA**) in August 2023. Specifically, the forecast annual percentage change in CPI used to inform **nbn**'s expectations of the application of the price controls under the varied SAU is 4.1% for FY25 and 3.3% for FY26. The SAU price controls which apply to the Tariff List published for FY25 and FY26 will be based on the actual annual percentage change in CPI published for the December quarter before the relevant Financial Year.

Capitalised terms in this Pricing Roadmap have the meaning defined in the SAU as varied on 17 October 2023 unless stated otherwise.

## Changes to this Pricing Roadmap

The SAU sets out specific circumstances in which **nbn** must update Prices and/or CVC inclusions in the Tariff List for a Financial Year. Where **nbn** updates the Tariff List, it must also update this Pricing Roadmap to maintain consistency, reflecting the changed Price and/or CVC inclusion in the first year of the Pricing Roadmap and any impact on the indicative prices for the second and third years.

For example, the SAU requires **nbn** to update the Tariff List to reflect:

- the Price on introduction of a new offer;
- a change to the Price of a previously Zero-Priced offer made in accordance with the SAU;
- a Price change resulting from the exercise by the ACCC of certain powers under the SAU;
- a Price change resulting from the SAU restriction on TC-4 discounts;
- a determination by **nbn** to reduce the Bundled Offer Ceiling or Price of an existing offer in the Tariff List;
- the withdrawal of a Price for an existing offer; and
- an adjustment to CVC TC-4 inclusions made in accordance with the mechanism set out in the SAU.

**nbn** will publish a new Pricing Roadmap by 1 May 2024 for FY25, FY26 and FY27. That Roadmap will be subject to the TC-4 Price Relativity Restriction in the SAU and may contain different Prices and CVC inclusions to those set out for FY25 and FY26 in this Pricing Roadmap, including where actual CPI and/or utilisation are different to the CPI and utilisation assumptions used in preparing this Pricing Roadmap.

**Notes:**

- <sup>1</sup> Additional Connectivity Virtual Circuit Offer (TC-4) charges apply for CVC TC-4 utilised in conjunction with each of these Bundled TC-4 Offers in excess of any CVC TC-4 inclusion which is part of that Bundled TC-4 Offer (where the utilisation relative to the inclusion is determined on a per-AVC TC-4 Product Component basis).
- <sup>2</sup> The SAU states that the Basic Bundled Offer (and its Monthly Recurring Charge, being \$12.00 in FY24) will apply on a pro-rated daily basis for each day on which an AVC with the relevant bandwidth profile is used as an input into an Access Seeker Product or Downstream Product which is a broadband service which includes a voice component and utilises 0.1 Mbps of TC-4 (PIR) or less of capacity and that on other days, the Bundled TC-4 Offer with a bandwidth profile of 12 Mbps PIR (TC-4) which is not the Basic Bundled Offer (and its Monthly Recurring Charge, being \$24.40 in FY24) will apply on a pro-rated daily basis.
- <sup>3</sup> These are potential maximum information rates, not peak information rates.
- <sup>4</sup> CVC TC-4 Inclusions will be adjusted on 1<sup>st</sup> July and 1<sup>st</sup> January of FY25 and FY26, in accordance with clause 2B.5 of the SAU. The SAU also provides for a single CVC inclusion adjustment in FY24, which will be relative to the CVC TC-4 Inclusions set out in Attachment E of the SAU and will take effect on 1 December 2023 – that adjustment is reflected in the CVC TC-4 Inclusions for FY24 stated in table 1.3 above, which are greater than those in the 'Indicative Pricing Roadmap' published by **nbn** in August 2023.
